

PRESS RELEASE

SYNAIRGEN PLC
(‘Synairgen’ or the ‘Company’)

Patent Granted for Lung Barrier Screening Test

Southampton, UK – 11 February 2008: Synairgen plc (LSE:SNG), the company developing novel therapies for asthma and COPD, today announces that a US patent has been granted for a screening test that can identify compounds capable of improving lung barrier function in asthmatics (“Barrier Function”).

In asthmatics, the cell barrier that lines the lungs is poorly formed and may be one of the root causes of asthma. It is believed that external irritants such as pollen, air pollution and viruses may pass through this ‘leaky’ barrier thereby creating the inflammation, which many conventional steroid-based asthma therapies are designed to treat. Synairgen’s patented test enables it to validate early stage compounds with the potential of improving Barrier Function.

Using the screening test, Synairgen has shown that a panel of growth factors can restore Barrier Function in its proprietary asthmatic cell models. The Company has engineered one of these factors to target the specific cells associated with Barrier Function and it is being developed for delivery by inhalation by Synairgen.

Richard Marsden, Managing Director of Synairgen, said:
“The granting of this patent validates the novelty of our approach to asthma research. We have successfully used the ‘screen’ to optimise Synairgen’s growth factor which is currently in pre-clinical development.”

About Synairgen

Synairgen is a drug discovery company founded by Professors Stephen Holgate, Donna Davies and Ratko Djukanovic, focused on identifying and out-licensing new pharmaceutical products which address the underlying causes of asthma and chronic obstructive pulmonary disease. Synairgen is listed on AIM (LSE: SNG).

For more information about Synairgen please see www.synairgen.com.

Asthma statistics

- There are approximately 22 million asthmatics in the USA(1)
- The economic cost to the USA is \$19.7 billion per year(2)
- Asthma accounts for 1,770,000 emergency department visits per year in the USA(1)
- The cost of emergency department visits and in-patient care in relation to asthma in the USA is \$4.7 billion(2)
- 50% of the total cost of the asthma is apportioned to 10% of the asthmatic population with the severest disease(3)
